## Understanding Kratom's Legal Status in Texas

### State-Level Regulations

Texas maintains a **legal status for kratom** at the state level, making it one of the more kratom-friendly states in the nation. Unlike states such as Alabama, Arkansas, Indiana, Rhode Island, Vermont, and Wisconsin where kratom is banned outright, Texas has not enacted statewide prohibition legislation.

The Texas Department of State Health Services has not classified kratom as a controlled substance, allowing residents to purchase, possess, and consume kratom products legally. This stance aligns with the growing recognition of kratom as a botanical supplement rather than a dangerous drug.

### Local Restrictions and Ordinances

While Texas state law permits kratom, several municipalities have implemented their own restrictions:

#### Cities with Kratom Bans:

- San Antonio (banned since 2019)
- Killeen (restricted sales)
- Several smaller municipalities

#### Age Restrictions:

Most areas that allow kratom sales implement minimum age requirements of 18 or 21 years old.

### Federal Considerations

The **Drug Enforcement Administration (DEA)** continues to monitor kratom but has not scheduled it as a controlled substance at the federal level. The **Food and Drug Administration (FDA)** maintains its

position that kratom should not be sold for human consumption, creating a regulatory gray area that affects how vendors market their products.
